

# INTRODUCING ACEAS

## Advanced CEA Estate Agencies System

A new e-Service for estate agents (EAs) and real estate salespersons (RESs) for licensing and registration management.

### Enjoy faster processing of applications

With enhanced workflows and system verification capability, the licence and registration applications process is now 2x faster. Approval now takes 2 to 3 weeks – compared to 4 to 6 weeks previously – for applications that meet all requirements.

### Experience more efficient workflows

With auto-population of data fields, save 5 minutes for every application form you submit. That's a time saving of about 150 hours per year for a medium sized EA. Enjoy the convenience of pre-filled application forms, with data fields auto populated from EAs' and RESs' profile, MyInfo data and data from the last submitted application

### View new dashboard with overview of tasks requiring your action

Enjoy a personalised, one-stop dashboard to view the following information:

- Profile information
- Application details and status
- Renewal status, e.g. eligibility for renewal, CPF MediSave contribution and CPD fulfilment statuses

### Bulk submission of applications

Introducing bulk submission, allowing EAs to conveniently submit multiple RES applications with the click of a button. EAs can now hit the 'submit' button once to initiate 100 new RES applications at one go, instead of previously submitting 100 separate applications.

### Use the new e-payment function for new and renewal applications

Opt for e-payment modes such as credit card and PayNow for payment of fees, in line with Singapore's Digital Government Blueprint.

### Get timely notifications on the status of applications

Stay on top of your applications with e-mail notifications at the key stages of the application process:

- When the Real Estate Salesperson has submitted the application to the Estate Agent
- When the Estate Agent has submitted the application to CEA
- If CEA has returned the application to the Estate Agent for amendment or clarification
- When CEA has approved the application
